

USERS MANUAL

FIG 1

FIG 1

Take all CleanCamp fire kit accessories out of the travel bag. Open the safety cloth completely and lay it on the ground shining side down. The safety cloth provides the foundation for the campfire. There is a pillow inside the safety cloth, on which the wood needs to be piled.

FIG 2

FIG 2

In the paper bag, you will find sticks of birch tree for building the campfire. Build the frame by putting the sticks on the pillow as shown. Use part of the paper bag as an accelerant.

FIG 3

FIG 3

Put one stick on top of the frame and light the fire. Add wood when necessary. Use birch tree sticks only (maximum length 15 cm).

FIG 4

FIG 4

If needed the safety cloth can be used as a windbreak by lifting the edge of the cloth with a twine (see Fig. 4).

FIG 5

FIG 5
Campfire without windbreak.

FIG 6

FIG 6
After the fire has burned down, ash and coal will be left on the pillow. Dispose of the ash and coal according to regulations (Not compostable!).

MAKE SURE THAT THE FIRE IS COMPLETELY EXTINGUISHED!

FIG 7

FIG 7
Wrap the pillow inside the safety cloth.

FIG 8

FIG 8
Put the CleanCamp fire kit equipment into its travel bag. Pillow and safety cloth are ready for the next use.
